

FLAG IN EVERY SCHOOL PROJECT

The ushering of the new democracy has had an impact on the development of new National Symbols. The first symbol to be replaced was the National Flag.

Newly introduced symbols are not always readily recognised and accepted by the public due to various reasons, including the influence from our political past. Like brands of popular products, national symbols need to be promoted so as to increase recognition levels. One of the key motives for inclusive national symbols is their ability to unite a nation, and furthermore, to instil a sense of pride. To this effect the Social Cohesion and Social Justice Sub-cluster undertook to popularise national symbols through various strategic means.

In 2001 the then Department of Arts, Science & Technology commissioned All Africa Consultants CC & Langa Research & Facilitation CC to undertake an exploratory study on knowledge and recognition levels of the National Symbols.

According to the findings of this research:

- ❖ **The flag is the most popular amongst the national symbols, yet people are not familiar with etiquettes and guidelines pertaining to the handling of the Flag.**

The research recommended that the National Symbols be popularised among various target markets:

- ❖ **The educational sector should be the main focus target for the popularisation of symbols.**
- ❖ **The Flag in particular, to be hoisted and lowered within the school premises.**
- ❖ **A user friendly booklet on National Symbol guidelines be developed and distributed to learners.**

Flag in Every School project is one of the projects initiated to make people understand and appreciate national symbols as part of a wider programme to popularise National Symbols. The aim of this project is to ensure that each school in South Africa is equipped with a National Flag and a Flagpole. The project is aimed at cultivating patriotism and promotes social cohesion.

The project was formally launched by both the Minister of Arts and Culture and of Education on 19 September 2005. AZ Berman Primary School in Mitchells Plain, Western Cape, was chosen to be a launch venue. A flag pole was installed and the new flag hoisted during the launch.

This project encourages the flying of the flag in schools and thus applauds the initiatives from the provinces, the schools, individuals, private sector and civil society organisations that contributed in different ways to increase the number of flag flying in schools. Provincial Departments of Education are involved in the crucial part of the project which entails coordination of lists of schools that must be supplied with flags and flagpoles.
